- a. **In Israel** – “From Dan to (south of) Beersheba”! (1 Kings 4:25) This course is designed to examine Biblical history in its geographical context. The country is examined first as a whole and then on a regional basis, observing how the character of each region and the routes that passed through it influenced the history of the area. Attention is given to the imagery used by the Biblical writers in connection with each region, as well as to the contributions of archaeology, other ancient texts, and anthropological models in understanding the Biblical world and its peoples. Readings, map work, and classroom lectures prepare students for their visits to historical/archaeological sites.
- b. **In Jordan** - Lectures and ten days of field trips immerse the student in the rich history of the area in which the tribes of Reuben, Gad and the half-tribe of Manasseh established themselves, Moses died, Elijah departed in a chariot of fire and both John the Baptist and Jesus ministered! Regions examined include both those that were settled by the Israelites (Gilead and the Medeba Plateau) and those of their neighbors (Ammon, Moab and Edom). Since certain areas are accessible only by jeeps and pick-up trucks, this course is only for the adventurous.
